

List of the timber species, protected in CITES and according to Regulation (EC) 338/97

Status: 26.11.2019 (CITES), 14.12.2019 (EU)

In the table on the following pages all currently protected tree species are listed for the above-mentioned status. The species are sorted alphabetically by scientific species name. If the protection status is associated with an annotation, this is indicated by the hash tag '#' and a number next to the protection status. The explanation of each annotation can be found at the end of the table.

The species protection regulations depend on the appropriate protection status and, if applicable, on the associated annotation. For this purpose, please note exclusively the protection status of the respective species according to Regulation (EC) No. 338/97, which you can find in the column 'EU protection'. The date in brackets below the protection status refers to the day from which the protection status became legally effective. If a protection status has a history, the protection status that is no longer valid is displayed in gray under the current protection status. This information is required when it has to be proved that the wood in question originated before the species was first listed in CITES. (pre-convention).

For reasons of overview, the individual species of the genera *Dalbergia spp.* (rosewood) and *Diospyros spp.* (ebony) are listed at the end of the table.

We have described the species protection provisions for the import or re-export of wood of protected tree species in detail on our website.

Current note

At the 18th CITES Conference of the Parties it was decided to include the entire genus *Cedrela spp.* in CITES Appendix II. In contrast to all other decisions of the 18th Conference of the Parties to CITES, the mentioned listing will only enter into force after 12 months on 28.08.2020 under international law. This ensures that the authorities and affected companies/traders have sufficient time to prepare for implementation. Until this amendment enters into force, the current listings of some *Cedrela* species in Appendix III CITES/Appendix C VO(EG) 338/97 and Appendix D VO(EG) 338/97 (see table below) will remain valid. In order to avoid irritations, the listing of the genus *Cedrela spp.* has not yet been included in the table. This will only be done shortly before the entry into force of the mentioned listing.

(until 01.01.2017 letter (f) read as follows: finished products packaged and ready for retail trade, this exemption does not apply to beads, prayer beads and carvings.

#15 (from 26.11.2019 CITES, from 14.12.2019 EU)

Designates all parts and derivatives, except:

- a) leaves, flowers, pollen, fruit, and seeds;
- b) finished products to a maximum weight of wood of the listed species up to 10 kg per shipment;
- c) finished musical instruments, finished musical instrument parts and finished musical instrument accessories
- d) parts and derivatives of *Dalbergia cochinchinensis* which are covered by annotation #4;
- e) parts and derivatives of *Dalbergia* spp. originating and exported from Mexico which are covered by an notation #6.

#15 (wording valid until 25.11.2019 CITES, until 13.12.2019 for EU)

Designates all parts and derivatives, except:

- a) leaves, flowers, pollen, fruit, and seeds;*
- b) non-commercial trade of a maximum total weight of 10 kg per shipment;*
- c) parts and derivatives of *Dalbergia cochinchinensis* which are covered by Annotation #4;*
- d) parts and derivatives of *Dalbergia* spp. originating and exported from Mexico which are covered by An notation #6.*

#16

Designates seeds, fruits and oils

#17

Designates logs, sawn wood, veneer sheets, plywood and transformed wood

§4

Logs, sawn wood and veneer sheets

(5)

Artificially propagated hybrids and cultivars of *Taxus cuspidata*, live, in pots or other small containers, each consignment being accompanied by a label or document stating the name of the taxon or taxa and the text "artificially propagated", are not subject to the provisions of the Convention.
